

# **MY HANA PROJECT**

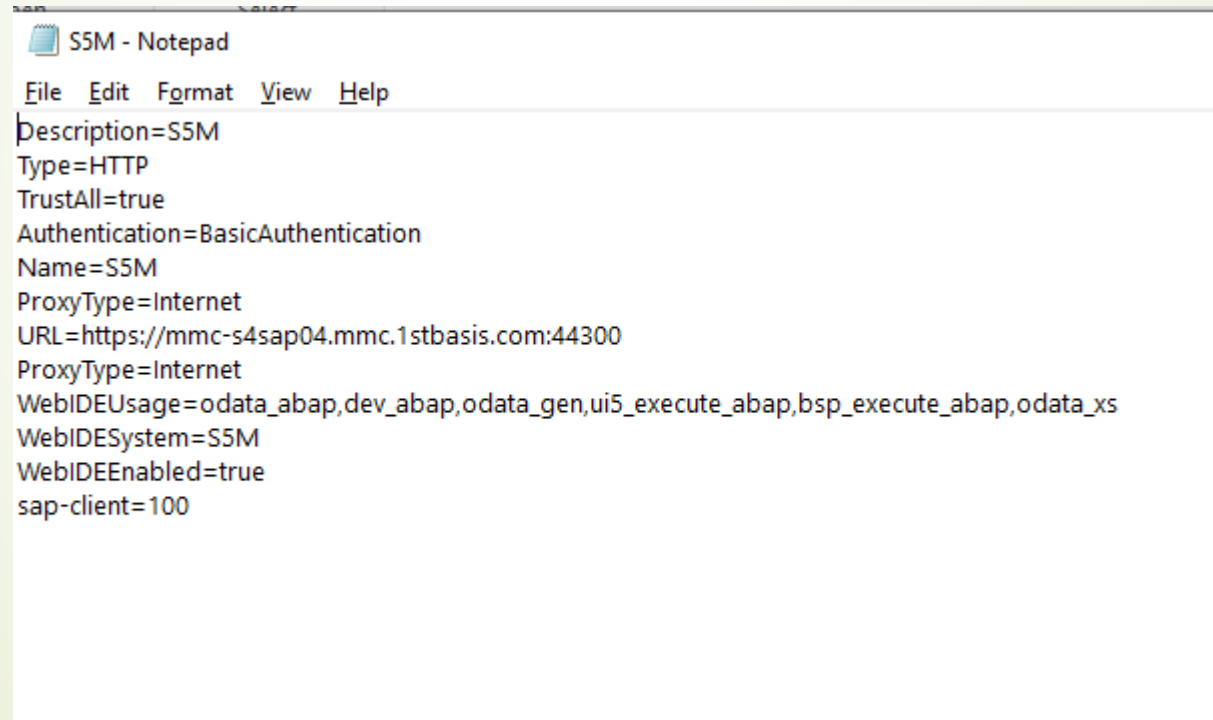

**Part 2 – create UI5 application  
based on my ODATA service**

I created connection to SAP SYSTEM for my WEB IDE personal edition.

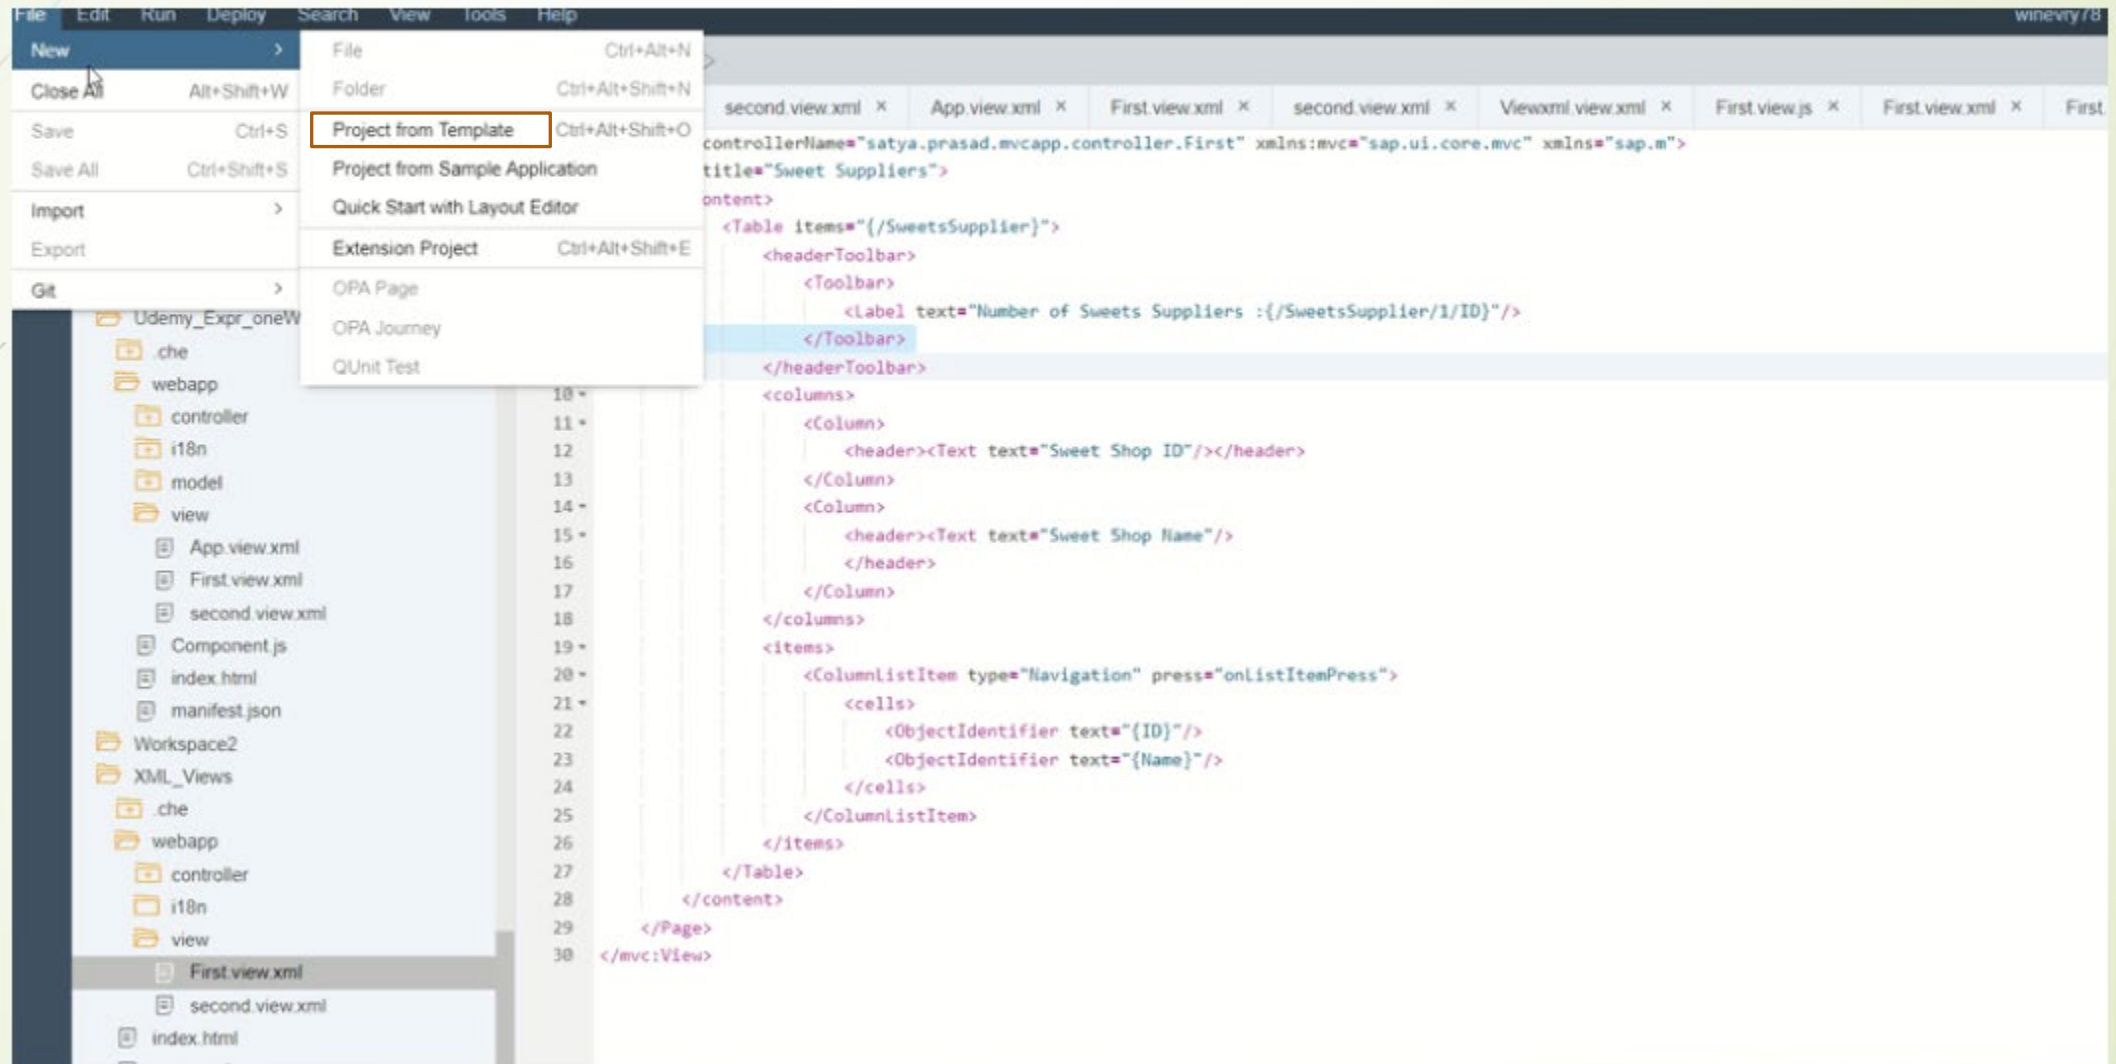

The file location:

\sap\_webid\eclipse\config\_master\service.destinations\destinations

```
S5M - Notepad
File Edit Format View Help

### Annotation Selection

Select the desired annotation files and rank them in the order in which they will be loaded.

Note: If the annotation files overlap, the one loaded last will overwrite the previous ones.

The selected service contains annotation data.

+ Add Annotation Files

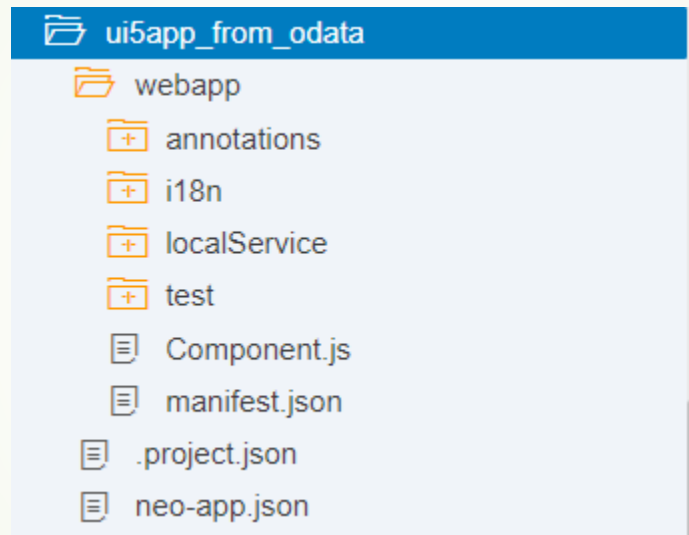

<input type="checkbox"/>	Rank	Name	Source	
<input type="checkbox"/>	1	Selected Service Metadata	Remote	
<input checked="" type="checkbox"/>	2	ZST7_ODATA_CUSTOMER_ANNO_MDL	Remote	
<input type="checkbox"/>				
<input type="checkbox"/>				
<input type="checkbox"/>

The screen for item creation will be opened

The screenshot shows the SAP user interface for creating a new item. The top navigation bar includes a user icon, back and home arrows, the SAP logo, and a dropdown menu labeled "create ui5 app from own odata service". Below the navigation bar is a breadcrumb area with "[no title] /" and a share icon. The main content area is titled "General Information" and contains several input fields: "Material Number" with the value "MAT\_TEST1", "Material Group" with "GR2", "Item Type" with "2", "Amount" with "1,800.00" and a currency dropdown set to "eur", and "Currency" with "eur". At the bottom right, there are "Save" and "Cancel" buttons.
